Rehabilitation of Anechoic Chamber

REF : CCD-M72-217 dated 19 May 1972

25X1A
1. FY-1972 funds have been provided to accomplish the rehabilitation of the Anechoic Chamber [REDACTED]. In reviewing the reference, the D/CO and DD/CO remarked that this type of work can be anticipated long in advance of the time it becomes necessary and the rehabilitation should have been programmed in a routine manner. They approved proceeding with the rehabilitation because we fortuitously were able to provide the funds in this fiscal year.

2. As you know, late this calendar year and early next year we will prepare the next OC program, with particular emphasis on FY-1975 requirements. Prior to that time it is recommended that you study your facilities improvement needs for the future and coordinate your requirements with Chief, SCD, the OC facilities program manager. OC-SCD will analyze the overall OC facilities requirements and schedule necessary improvements so that the financial impact in a single fiscal year is minimized.
